2. **Instructions**
 - [Download Instructions](#)
 - [Off-Campus VPN Download Instructions](#)
3. **Serial Number**
 - Serial Number is provided by the vendor at time of installation. Please note, you must be on campus or use the NCSU **Full Tunnel VPN** to install SnapGene so that it appropriately registers.
4. **Allowed to be used virtually?**
 - No

1 Navigate to **software.ncsu.edu** and find the SnapGene page.

2 Click the Off-Campus VPN Download Instructions link. **You will have to request Full Tunnel VPN access and download the Cisco AnyConnect client.**

3 Connect to the Full Tunnel VPN using the Cisco AnyConnect client and your credentials.

4 The SnapGene Registration will autofill if you are installing SnapGene for the first time.

5 Enjoy SnapGene!

Connect with the NC State Full Tunnel VPN

KB0016001 **ALSO IN FULL TUNNEL VPN**

▲ AUTHORED BY NIK DWILAKRIS • ■ 10MO AGO • ★★★★★

Using the NC State Full Tunnel VPN encrypts and routes all traffic through the VPN connection to NC State Campus before being sent to its final destination.

Warning: The use of VPN software may be illegal in certain countries and could subject the user to criminal prosecution.

Before Connecting

- Request access to use the [Full Tunnel VPN](#) if you have not already done so.
- [Enroll in Duo Security](#) at NC State.
- [Download and install the Cisco AnyConnect](#) client for your device.

Connecting to the Full Tunnel VPN

Note: The Full Tunnel VPN connection may or may not grant access to NC State services the same way as when you are connected with the other VPN groups you generally use.
